Fire Hydrant Flow Test Request Form

Water District No. 7 may provide specific fire hydrant flow and pressure data when available. If this data is either out dated or unavailable, fire hydrant flow tests may be requested. Generally, a fire hydrant flow test will produce static pressure, a residual pressure and an available flow rate. To request this information, please complete the information below.

If a fire hydrant flow test is requested, this test can be scheduled with the Water District for a fee of \$150. Please include this payment with your application and mail or deliver to the address above. Once payment is received the Water District will schedule the flow test at its earliest convenience. The results of this test will be made available to the petitioner as they become available.
